2. Provide a State of Georgia valid picture ID including personal signature.
3. Submit proof of a valid State of Georgia contractor business registration (Occupational Tax Certificate).
4. Complete and sign a City of Stonecrest subcontractor permit application form.
5. Pay all required subcontractor permit fees.

General Notes Regarding Building & Subcontractor Permits

1. Building and subcontractor permits are required prior to starting any construction work within the city limits.
2. Homeowners residing in subdivisions with covenants in place should obtain written approval for their addition or renovation construction from their homeowner's association prior to obtaining a building permits. Most all city subdivisions are normally subject to restrictions imposed by covenants or subdivision regulatory committees. Homeowner closing documents will normally outline what improvements can and cannot be made on a property. If you are not sure of covenant restrictions, contact the subdivision Homeowners association. Approval granted by covenants or subdivision regulatory committees does not authorize proceeding with

construction. Permits are still required prior to commencing any construction work. It is legally important to understand that the city does not enforce covenant regulations.

3. Building permits must be obtained, and subcontractor trade permits shall be issued simultaneously. Exception: When no other work (a single scope of work) is planned or associated to the subcontractor work that will be completed at your site, a "Stand Alone" subcontractor permit may be issued without first obtaining a building permit. Typical examples of a standalone subcontractor permits issued are water heaters repairs, AC compressor elements and electrical service replacements to do an emergency. For night and weekend emergency repairs, a subcontractor permit is still required, but the installer must obtain the permit on the next business day during normal City business hours.

4. If you are a homeowner building or remodeling your own home or have hired a contractor, require all hired contractors and subcontractors to provide you with a city issued permit / placard for their work, which will indicate your work site address, prior to allowing them to proceed with any construction.

5. It shall be the responsibility of the general contractor to assure that all hired subcontractors have a valid city issued permit prior to starting any work on site.

6. Georgia law, O.C.G.A, 43-14, requires all persons contracting or performing for hire any plumbing, electrical, low voltage, heating and air conditioning or utility work in Georgia to be duly and currently licensed by the Georgia State Construction Industry Licensing Board for that work.

7. The City of Stonecrest will not issue subcontractor trade permits to any non- licensed person performing any of these trades, except that a homeowner performing their own work on his / her primary residence may obtain his / her own permit for that work and shall complete the homeowner affidavit. All work shall comply with all codes and laws.

Plan Review

All Permit Applications must be submitted through the City of Stonecrest's Online Permit Portal:

<https://www.citizenserve.com/citizenserve-login/>

Submit the following PDF files with your online application:

Note: Individual PDF files may not exceed 100 MB. Larger files should be separated into individual PDFs.

Construction Documents. All plans must be clearly drawn to scale (feet/inches). Depending on the type of construction, plans may be required to be prepared by a registered design professional. See Section 5-29 of the City Ordinances for details on structural plan requirements.

 - a. If vertical wood posts or metal columns are to be used to support elevated floors or roofs, provide details of the assembly to include size, length and composition, anchoring and connection details.
 - b. Note: if floor or roof trusses are proposed in the project construction, the manufacturers detailed drawings shall be provided and sealed by a State of Georgia Registered Design Professional. All truss drawings shall be reviewed and must be approved by the Building Official prior to the installation of trusses.
 5. Show location of water heaters, electrical service & distribution panel(s), heating & air conditioning appliances, plumbing fixtures, major appliances, cabinets, countertops and other built – in items.
 6. Include dimensioned elevation views of all construction (vertical side) of exterior walls, roof lines and roof pitches for new construction.
 - a. Show dimensioned elevation views of all construction affected exterior wall and roof lines for addition or alteration to existing buildings.
- Any change from city approved building plans to as built on site construction shall be submitted as a revised drawing and reviewed by the Building Official for code compliance prior to making any changes.

Site Plan Documents.

Residential interior alterations or renovations, which do not include any change in location of any exterior wall or roof line, do not require submission of a site plan or plot plan at the time of permit issue.

A copy of the approved house location plan shall be on the permitted site and available to inspectors at all times.

No building or similar structure, nor any part thereof or attached to, shall encroach into any setback area, easement or required buffer area without prior written City Official Approval.

Applicant submitting plans showing buildings or related structures located less than one foot (1') from a setback or easement or five feet (5'0) from a buffer shall be required to submit an as built survey to the Building Official prior to receiving a certificate of occupancy or certificate of completion. This survey must include information required in the subsequent items #1 thru #9 and must be prepared by a Georgia registered surveyor.

Surveys showing encroachments not approved by governing officials will result to a denial to issue any type of certificate of occupancy. until such time as the building official's written authorization is obtained.

Any change from city approved site plans to as built site plans must be resubmitted by the permit holder and approved by the Director of Planning and Development.

Site plan or plot plan shall be of sufficient clarity to show at least the following information:

1. Site Street address, subdivision name, lot/block number. If applicable, name and signature of the person or firm submitting the site plan
2. Site boundary survey with north arrow
3. All street names, widths, and location of right-of-way
4. Location of all setbacks including distance between structures on adjacent properties
5. Location and type of all easements, buffers, and drainage structures on adjacent properties
6. Location of flood plain areas and minimum lowest floor elevation required, if site applicable
7. Location of all existing and proposed buildings or structures to include dimensioned structure footprints showing overhangs. (City of Duluth Unified Development Code 304.01)
8. Location and type of any existing or proposed patios, walks, steps, drives and other paved areas
9. Location, height and type of any site retaining walls, ancillary buildings, or other structures.
